Orbital Odyssey (About)

Theme: A Space adventures Game where you and your crew travel to worlds in order to complete specific objectives.

Multiplayer: Yes, your crew size changes based on the current ship upgrades progress. For example the ship[will need the proper life support equipment and storage space to accompany a new player. However the game can be played solo using a host based network via Unity Net Code.

Purpose: Sort of like lethal company but quotas don't matter. The point is to travel to worlds, acquire resources, go back to your ship and automate manufacturing for new weapons, armor, abilities, and other resources. **Each Day on a planet will be 10 minutes***

1. Crew Unlocking: as the players travel to new worlds of different themes, they meet allies. When the player completes certain objectives of that world, the lobby size goes up by one and a new player can join to play as that character.

2. Each player has unique stats and abilities that can make the difference in a fight

Characters:

(Blue – Player 1):

Name: (Input field from Player)

Age: 20

Role:Engineer/Healer

Stats:

Strength: Moderate

Speed: Moderate

Intelligence: High

Health: Moderate

Damage: Moderate

Quirk: can heal others slowly and recovers their health 35% faster

(Red – Player 2):

Name: (Input field from Player)

Age: 20

Role: Attacker/DPS machine

Stats:

Strength: Low

Speed: High

Intelligence: Low

Health: Low

Damage: High

Resistance: Low

Quirk: has a dash ability and has a firerate/reload speed 35% faster then teammate.

(Green – Player 3):

Name: (Input field from Player)

Age: 20

Role: Defence/Tank

Stats:

Strength: High

Speed: Low

Intelligence: Moderate

Health: High

Damage: Moderate

Resistance: High

Quirk: can move super heavy objects

(Yellow – Player 4):

Name: (Input field from Player)

Age: 20

Role: Hacker

Stats:

Strength: Low

Speed: Low

Intelligence: High

Health: Moderate

Damage: Low

Resistance: High

Quirk: can hack panels to unlock doors or complete minigames with higher success.

Modes: On Start the user will be able to select 2 different modes:

1. Normal: 3 respawns per player, death on the 3 = no respawn. Dead players can still spectate.
2. Realistic: the Hard mode where enemies are buffed and every teammate gets 1 life.

World:

1. Space craft that start small but can be expanded to suit the growing needs for the crew.
2. The Crew travels to the planet to complete one objective at a time. These can stem from
 - “Cut a set amount of wood before the storm arrives,”
 - “Extract the Data from the township while the natives swam you,”
 - “”
3. The game keeps track of each objective you complete
4. A new player is met on either the first mission or in orbit before landing. NOTE Im still working on what the stories is here and how player will interact meet and grow

Ship Manufacturing/Automation:

1. The resources acquired will be put towards either ship upgrades, new weapons, better armor, by acting like a todo scene.

For example Armor upgrade MK1 cost 50 wood 20 iron and 10 coal. So the players will need to land acquire those resources and extract within a time limited

Story:

The Game Starts out with the blue player traveling to a planet in hopes of taking down a Bounty that's the villain. This villain is the most infamous in the cosmos. However He gets stranded on a planet and has to rebuild his ship on day 1 the **(Green – Player 3)**:

Name: (Input field from Player)

Age: 20

Role:

Stats:

Strength:

Speed:

Intelligence:

Health:

Damage:

Resistance: he needs to acquire more resources to fix his ship and travel deeper into the cosmos tracking this guy down. For each new planet he reaches he meets an ally that increases the server lobby by 1. Each new planet will have new challenges that will encourage team strategy in the acquisition of more resources.
